CAREER SUMMARY

Backend developer with many years of experience take responsibility for the server-side of web applications. Development web app with the goals of effective solutions. Participating in the entire application lifecycle, writing clean codes to develop functional web applications, troubleshooting and debugging applications and optimizing performance; Hands-on experience with programming languages like PHP; working knowledge of CMS framework, has many years of adaptation with multiple open sources, My key strengths include being able to use web based systems. Integration data from multiple frameworks or open source together (Mysql, ERP, Facebook, Google spreadsheet, LimeSurvey, SurveyMonkey, Github, Zoom meeting, Voxy, IXL Learning, Learnosity). Good knowledge of Relational Databases, especially MySQL and web server applications such as Linux, LAMP. Build php extension for confidential information Web App (examples: Payslip, Salary review, Performance bonus and PIT). **Always try, try to research, learn new technologies to adapt to the requirements.**

SKILLS & TOOLS

Programming language

PHP

HTML/CSS/Bootstrap

JavaScript/Jquery/Ajax

Python (Django/Flask, Selenium, Fanout, Kafka)

Nodejs (Express & Mysql)

JMeter / Figma

C++ / VBA

Database

Mysql

SQL Server

MongoDB

Framework - Open source - CMS

Laravel

Codeigniter / Zend framework

Moodle

Cordova

Asterisk

Joomla / Lime Survey / Xenforo

Management tools

Github/Gitlab/Bitbucket/SVN/

Smartsheet/ Google sheet/ Redmine

Jira (Kanban)

Monday.com / Clickup

Setup & Configuration

LAMP / Linux / Docker

HA-Proxy

Cwp control panel

Redis/Memcached/OPcache

Researching

Ruby On Rails

WORK EXPERIENCE

Software Engineer

07/2016 - Present
